

## Supplier of Monopines and Replacement Branches

Our new design will blow your mind

Ehresmann Engineering Inc., is proud to introduce its newly designed Monopine branches for the Communications Industry. Our branches have been wind tunnel tested over **115 MPH sustained wind**. The above 5' branch was tested at **150 MPH sustained wind**. We manufacture the pole and the branches in-house at our 80,000 square facility. This allows us to control the whole manufacturing process. Shipping the monopine with branches can be done at the same time.

Made in the USA

Exceeding Customer Expectations Since 1983

Ehresmann Engineering's pine and custom trees are designed with both antennas and realistic appearance in mind. The branches are RF transparent and UV protected for years of maintenance free tree towers.

Model EEI55Pine

Our epoxy bark has a class A rating for flame spread and smoke density. Ehresmann's bark is applied directly to the substrate and the bark's life expectancy is thirty years. We also offer custom bark applications and imitation bark paint.

***We can provide branches, barking of towers, and monopines.
